Investment review

Dear Investor

Welcome to the PUTM Bothwell Asia Pacific (ex-Japan) Fund interim report for the six months to 15 November 2022.

Performance Review

Over the review period, the PUTM Bothwell Asia Pacific Fund rose 4.06%. Source: Aberdeen Standard Investments for the six months to 15/11/22. This compared to its benchmark index return of 0.93%. Source: Factset, MSCI AC Asia Pacific ex Japan for the six months to 15/11/22.

The table shows how the Fund performed against its benchmark index over the last five discrete one-year periods.

Standardised Past Performance

	Nov 21-22 % growth	Nov 20-21 % growth	Nov 19-20 % growth	Nov 18-19 % growth	Nov 17-18 % growth
PUTM Bothwell Asia Pacific (ex-Japan) Fund	-11.9	9.8	19.0	13.4	-6.0
Benchmark Index	-10.9	7.4	17.3	10.5	-7.6

Past Performance is not a guide to future performance

Source: Fund performance is Aberdeen Standard Investments, benchmark index performance is Factset, MSCI AC Asia Pacific ex Japan to 15 November for each year.

Please note that we calculate all past performance figures without taking the initial charge into account.

The value of units and the income from them can go down as well as up and is not guaranteed. You may not get back the full amount invested.

Investment review

Portfolio and Market Review

Most Asian equity markets were volatile during the period as sentiment was hit by concerns around inflation, the sharp rise in US interest rates and the growing prospect of a global recession. While some countries in the region benefited from the reopening of their economies, further lockdowns in China added to market jitters. Fears about the worsening global backdrop and a steady move by investors from growth to value stocks were especially noticeable in the technology-heavy markets of South Korea, Taiwan and China. India and Indonesia proved more resilient, but Australian equities were hit by a surprise interest rate hike and a fall in commodity prices.

During the period, the Fund rose 4.06%, outperforming the benchmark's return of 0.93%.

In sector terms, financial stocks made the biggest contribution to performance thanks to good stock selection and our overweight to the sector. Bank Central Asia, which has a strong balance sheet and is our key holding in Indonesia, benefitted from the central bank's interest rate increases. Robust exports and higher commodity prices also enabled the Indonesian rupiah to be relatively resilient against the US dollar. Singapore's DBS Group and Oversea-Chinese Banking Corporation also performed well as the market expects to see them deliver sequential growth in their profit margins.

Our overweight to India proved beneficial as the market was more resilient than the wider region in the period. Good stock selection also played its part as Housing Development Finance Corporation was lifted by an improving credit cycle outlook as the home loan segment remained strong with signs of improving asset quality. SBI Life Insurance, our exposure to the insurance sector, rallied on insurance premium growth and higher margins, which was driven by product mix improvements and increasing sales efficiency. Car manufacturer Maruti Suzuki and construction giant Larsen & Toubro were also among the top performers.

Mining companies made a positive contribution as they recovered from weakness earlier in the year. In Australia, our holdings in BHP and OZ Minerals outperformed in the period. OZ Minerals' shares were boosted by a takeover bid from BHP as well as approval for a large copper and nickel project in Western Australia.

On the other hand, a few of our China holdings were sold off as economic growth slowed and new Covid-19 lockdowns were introduced in parts of the country. The retail sector was particularly hard hit with Kweichow Moutai and luxury car dealer Zhongsheng Group affected by the weak market sentiment. Even share buybacks at the latter could not prevent its shares being dragged down. Yunnan Energy New Material was among the stocks to suffer as investors switched out of companies with high valuations and into sectors seen as relatively more defensive.

The communication services sector was a detractor due to stock selection. GDS Holdings, which operates high-performance internet data centres, dropped back after it lowered market expectations for its full-year results. Concerns about the impact of the weaker macroeconomic backdrop on advertising spending was the source of weakness in Kakao's stock during the period.

Stock selection was better in the information technology, but Taiwan Semiconductor Manufacturing Company's shares weakened due to geopolitical tensions and concerns that the slowdown in global growth could translate into lower sales of electronic devices.

In terms of portfolio activity, we added three new stocks during the quarter. Australian oil and gas group Woodside Energy, Indonesian telecoms group Telkom Indonesia (Telkom) and China Tourism Group Duty Free (China Tourism). Telkom has sound financial fundamentals and we believe the stock should prove defensive through the current market uncertainty. We participated in the Hong Kong IPO of China Tourism due mainly to the attractive discount on offer. It is the largest duty-free operator in China and its scale provides stronger bargaining power, with the potential for higher profit margins.

Against these, we sold our positions in Sea, Fisher & Paykel Healthcare, Shenzhou International, SK Hynix, Techtronix Industries, Hub24, Shenzhen Inovance Technology and Hangzhou Tigemed Consulting due to our waning conviction in these companies. We also exited our position in Sands China as we needed to consolidate our exposure to stocks that have benefitted from the re-opening of the Chinese economy. Finally, the challenging short-term environment in the UK and generally mixed outlook for Xero led us to sell our holding.

Investment review

Outlook and Strategy

Stock markets in Asia and elsewhere have been volatile and that is unlikely to change any time soon. Markets continue to face a daunting set of challenges: rising interest rates to stem inflation, geopolitical risk, energy and food crises, and an increasingly fragile world economy. Asia will not be immune to global developments.

The good news is that the region is in a better position than developed economies in the West. More manageable price pressures have allowed central banks to normalise policy more gradually. We are also seeing policymakers turn more active in supporting their depreciating currencies given the strengthening US dollar. Many economies, particularly those in South-East Asia, are still bouncing back after their post-Covid-19 reopening, which should support earnings growth.

We remain positioned around structural growth themes, like domestic consumption, technology and green energy. Indeed, many of our holdings in these areas now look even more attractive to us given the recent sharp rotation away from growth stocks. Our focus remains on quality companies with strong balance sheets and sustainable earnings prospects that can emerge stronger in tough times.

Statistical information

Investment objective

The Fund aims to provide capital growth by outperforming the benchmark (before fees) by 0.5% to 1.5% per annum over any given 3 year period. The benchmark is MSCI AC Asia Pacific ex Japan Sterling Index (the "Index").

Investment policy

The Fund will invest at least 70% of the portfolio in equities and equity related securities of Asian, including Australasian, companies but excluding Japanese companies. The Fund may invest in emerging markets in the region. The Fund may also invest in companies that are headquartered or quoted outside the region which deliver a significant part of their business from the region, and whose securities are listed or traded on an eligible securities or derivatives exchange. The Fund can invest up to 15% in other regions.

The Fund's holdings will typically consist of equities or "equity related securities" which will include convertible stocks, stock exchange listed warrants, depository receipts, and any other such investments which entitle the holder to subscribe for or convert into the equity of the company and/or where the share price performance is, in the opinion of the Investment Adviser, influenced significantly by the stock market performance of the company's ordinary shares. The Fund may also invest in other transferable securities, which are non-approved securities (essentially unlisted securities), money-market instruments, deposits, cash and near cash and other collective investment schemes.

Derivatives may be used for efficient portfolio management and hedging only.

Investment strategy

Although a minimum of 70% of the Fund is invested in components of the Index, the Fund is actively managed. The Investment Adviser uses research techniques to select individual holdings. The research process is focused on finding high quality companies at attractive valuations that can be held for the long term. The Fund is managed within constraints, so that divergence from the Index is controlled.

The Fund's portfolio may, therefore, be similar to the components of the Index.

Revenue distribution and pricing

Units of the Fund are available as either Class 'A' Accumulation or 'B' Accumulation units (where revenue is reinvested to enhance the unit price). There will be two potential distributions in each accounting year: an interim distribution as at 15 November and a final distribution as at 15 May.

At each distribution the net revenue after deduction of expenses, from the investments of the Fund, is apportioned amongst the unitholders. Unitholders receive a tax voucher giving details of the distribution and the Manager's Report no later than two months after these dates.

Statistical information

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ←			Typically higher rewards, higher risk →			
1	2	3	4	5	6	7

This Fund is ranked at 5 (15/05/22: 5) because funds of this type have experienced medium to high rises and falls in value in the past.

Although this is a high risk ranking it is not the highest.

The above figure applies to the following unit classes:

- Class 'A' Accumulation
- Class 'B' Accumulation

Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. Please note the Fund's risk category may change in the future. The indicator does not take into account the following risks of investing in this Fund:

- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency rates will reduce the value of your investment.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This means that your money is at greater risk.
- The Fund may use derivatives to reduce risk or cost or to generate additional capital or income at low risk, or to meet its investment objective.

For more information on the Risk and Reward profiles of our Funds, please refer to the most up to date relevant fund and Unit Class Key Investor Information Documents (KIIDs). These are available online at www.phoenixunittrust.co.uk.

Notes to the interim financial statements

Accounting policies

The interim financial statements have been prepared under the historical cost basis, as modified by the valuation of investments and in compliance with FRS 102 and in accordance with the Statement of Recommended Practice (2014 SORP) for financial statements of Authorised Funds issued by The Investment Association in May 2014 (and amended in June 2017). Unless otherwise stated all accounting policies applied are consistent with those of the Annual Report for the year ended 15 May 2022 and are described in those financial statements.

Distribution table

For the half year ended 15 November 2022

Interim distribution in pence per unit

Group 1: units purchased prior to 16 May 2022

Group 2: units purchased 16 May 2022 to 15 November 2022

	Net income	Equalisation	2023 pence per unit payable 13 Jan	2022 pence per unit paid 15 Jan
Class 'A' Accumulation				
Group 1	2.4240	—	2.4240	1.3090
Group 2	2.4029	0.0211	2.4240	1.3090
Class 'B' Accumulation				
Group 1	6.3262	—	6.3262	5.4307
Group 2	6.2761	0.0501	6.3262	5.4307

Equalisation

This applies only to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to the holders of these units as a return of capital. Being capital it is not liable to income tax but must be deducted from the cost of the units for capital gains tax purposes.

Appendix

The Fund carried out stocklending activities for the purpose of efficient portfolio management and in order to generate income.

Revenue earned from these activities is shown in the Statement of Total Return.

As at 15 November 2022 there were no securities on loan or collateral held. Thus none of the disclosure is given.

Return and cost

	Gross return £000	Cost £000	% of overall returns	Net return £000
Fund	1	–	82.00	1
	1	–		1

The gross earnings were split by the lending agent as follows:

- 82% to the Lender (PUTM Bothwell Asia Pacific (ex Japan) Fund)
- 8% to the Manager (Phoenix Unit Trust Managers Limited)
- 10% retained by the Lending Agent (eSec)

Corporate information

The information in this report is designed to enable unitholders to make an informed judgement on the activities of the Fund during the period it covers and the results of those activities at the end of the period.

Phoenix Unit Trust Managers Limited is part of the Phoenix Group.

Ignis Investment Services Limited is part of the Standard Life Aberdeen plc group and its subsidiaries.

Unit prices appear daily on our website www.phoenixunittrust.co.uk.

Administration & Dealing: 0345 584 2803 (between the hours of 9am & 5pm).

Remuneration

The Manager has adopted a remuneration policy, up-to-date details of which can be found on www.phoenixunittrust.co.uk. These details describe how remuneration and benefits are calculated and identify the committee which oversees and controls the policy. A paper copy of these details can be requested free of charge from the Manager. Following the implementation of UCITS V in the UK on 18 March 2016, all authorised UK UCITS Managers are required to comply with the UCITS V Remuneration Code from the start of their next accounting year. Under the UCITS V Directive, the Manager is required to disclose information relating to the remuneration paid to its staff for the financial year, split into fixed and variable remuneration.

Risks

The price of units and the revenue from them can go down as well as up and investors may not get back the amount they invested, particularly in the case of early withdrawal. Tax levels and reliefs are those currently applicable and may change. The value of any tax relief depends on personal circumstances.

Management charges on some funds are charged to capital and therefore a reduction in capital may occur.

Depending on the fund, the value of your investment may change with currency movements.
